Click the LIVEVIEW icon to open the live view.

In the tree on the right hand side click on the + symbol adjacent to the recorder icon to expand the tree.

Drag the camera that you wish to view into one of the empty panes that occupy the majority of the screen space. This will cause live images from the camera to be displayed in the selected pane.

IS YOUR

Set the date to the day that you wish to view and ensure that the times cover the period that you are interested in.

Click the search button.

At the bottom of the screen the time line will populate showing the recording from the camera that you have selected as a green line – please note that if you are looking at video from today the line will not be complete as it is displaying a live timeline.

Ű		/		•				
					20)16-03-()8	
;	7	8	9	10	11	12	13	
			10:01:	37				
	_	_	_		_		_	

Clicking on the timeline will start video playing from the time selected in the currently selected video pane.

The wheel on the mouse can be used to zoom in (expand) and zoom out (contract) the scale upon which the timeline is displayed giving more detailed control of the time selected.

Archiving

Whilst in the playback window video can be archived from the recorder to the local computer for future use.

To select the start time for the clip to be downloaded, pause the playback at the start time then click the scissor icon;

Next, move the playback cursor to the time that you wish to end the download then click the scissor icon once it becomes blue again.

The download dialogue box will now open.
